Sacro Occipital Technic™ Methods of SOT® Chiropractic and  
Chiropractic Craniopathy

SORSI – where it began in 1924 and continues to discover and promote  
the essence of chiropractic internationally.

## Release The Power Within!

In my premedical studies, almost 50 years ago, the brain was thought to be unimaginably complex at one hundred million neurons with 1000 to 10,000 interconnections each. Just a few years ago glial cells were all the rage and they were claimed to be 10 times more numerous than neurons. Current studies suggest that the human brain contains about 85 billion neurons and about 86 billion glial cells. As you can tell, the “science” is fickle. But more to the point, the total neurons in the adult human is thought to vary plus or minus 25% **dependent upon environment and early development factors!** The implications of this fact are simply staggering.

One of the crucial early development factors is cranial function. SORSI doctors are the unsung heroes and pioneers in this essential component of children’s health. We are excited and pleased to have one of the masters of Pediatric Chiropractic Craniopathy presenting at the 2017 SORSI Homecoming Symposium, **Dr. Steve Williams**. Do not miss this rare opportunity.

Come to Denver for the SORSI Homecoming and gain insight and understanding into the essential cranial function of infants and children. You will be on your way to become an SOT® pioneer and provider of these much-needed services for the health and welfare of our future generations.

Looking forward to seeing you there.

Joseph F Unger Jr. DC  
SORSI Pres.
