

SORSI HOMECOMING SEMINAR

OCTOBER 31 – NOVEMBER 2, 2019

DENVER, COLORADO

COURSE OFFERINGS AND DESCRIPTIONS

SORSI is the only organization authorized by the founder, Major B. De Jarnette, DC, to research and present Sacro Occipital Technique (SOT®) to the chiropractic profession. SOT® methods are a form of analysis and treatment of human conditions using the spine and nervous system, utilizing a unique and comprehensive indicator system. SOT® methods will enhance, and is compatible with, any full spine chiropractic technique. This seminar is designed to present to new and experienced chiropractors and students, the foundations of the technique as well as some of the latest research and new applications of the work. SORSI has been presenting this type of seminar to the profession for well over half a century.

TRACK ONE: Thursday

FIRST TRACK: SOT® Methods - ESSENTIAL COURSE

INTRODUCTION TO SOT – OVERVIEW

1 ½ hours

THURSDAY, 8AM – 9: 30AM

The second track also attends this class

Marc Pick, DC, FICS, DACNB

This course is an overview of SOT® Technique with the underlying scientific neurological basis explored and explained for the student, novice, and advanced practitioners of the technique. Dr. Pick is a

World renowned chiropractic neurologist and fellowship level Craniopath.

INTRODUCTION TO CRANIAL RANGES OF MOTION

1 ½ hours

Thursday, 10am – 11:30am

Marc Pick, DC, FICS, DACNB

Doctor Pick will provide a hands-on presentation and demonstration of the normal cranial ranges of motion. He uses own ingenious tactile aids in teaching the practitioner to feel, with their own hands, cranial motion upon palpation.

FIVE STEP ANALYSIS

1 ½ hours

Thursday, 1pm – 2:30pm

Ann Michael, DC, CC

Deirdre D’Antonio, DC, CC

Jason Van Single, DC, CP

This class presents a five-step analysis used to differentiate SOT® methods Categories I, II, and III. This will be a hands-on class designed to give the student of novice firsthand experience in finding indicators and analyzing categories.

CATEGORY II – ANALYSIS

1 ½ hours

Thursday, 3pm – 4:30pm

Kephra Froehlich, DC, CC

Christopher Pepitone, DC, CP

This class presents in depth experience in analyzing the Category II patient. It is a hands-on class designed to give the practitioner knowledge and confidence in their clinical work with Category II. Category II is a sacroiliac weight-bearing lesion.

CATEGORY II – BLOCKING

1 ½ hours

Thursday, 5pm -6:30pm

Drs. Froelich and Pepitone

This class continues the Category II work with actual corrective blocking procedures. It is a hands-on class designed to instill practical knowledge and experience.

TRACK ONE: Friday

CATEGORY III

3 hours

Friday, 8am – 11:30am

Sheila Bochicchio, DC, CC

Christopher Ourganian, DC, AP

Daniel Foss, DC, AP

This class presents Category III. This is a “system failure” category often manifesting with debilitating sciatic nerve pain. The class will present the fundamentals of the analysis and treatment of the Category III patient in a manner readily assessable to the student and newcomer to the technique.

CATEGORY I

3 hours

Friday, 1pm – 4:30pm

Ann Michael, DC, CC

Clorinda Forte-Katz, DC, CC

James Weber, DC, AP

This class presents DeJarnette’s Category I, a dural torque category manifesting in cranial and/or visceral abnormalities. The class will present the fundamentals of the analysis and treatment of the Category I patient. While aimed at the novice, this class will benefit the practitioner of any level.

SB+ and SB-, and Vasomotor Adjusting,

Cervical Stairstep Technique

Category II- Long and Short Leg Technique

Sacral Cup Technique

1 ½ hours

Friday, 5pm – 6:30PM

Deirdre D’Antonio, DC, CC

Daniel Foss, DC, AP

Jason Van Single, DC, CP

This class provides analysis and technique for special adjustment procedures designed to enhance SOT® methods category work by focusing on post adjustment clinical considerations.

TRACK ONE: Saturday

CATEGORY RELATED CRANIAL ADJUSTING

And CRANIAL NON-SPECIFICS – PART I

EMERGENCY TECHNIQUES

Antidote Technique

Sacral CSF Activation

Pre-Adjusting Techniques

1 ½ hours

Saturday, 8am – 9:30 am

Deirdre D’Antonio, DC, CC

Doug Springborn, DC, CC

Ann Michael, DC, CC

This class presents powerful Basic Cranial work that can be safely applied by new practitioners with great clinical effect. These techniques include: Basic I, II, and III, the Antidote, Sacral CSF Pump (Pussyfooting), Sacral Alar Rotation (Uncle Tom), and Transverse Sacral Flexion and Extension. Cranial Bowl Lift, Mandibular Cranial Motion Technique, and Occipital Pump and Spread will also be presented.

CRANIAL NON-SPECIFICS – PART II

Post Adjusting Techniques

General Techniques

1 ½ hours

Saturday, 10am – 11:30am

Deirdre D’Antonio, DC, CC

Beth Forgosh, DC, CC

Doug Springborn, DC, CC

This class continues the presentation of Non – Specific Cranial Techniques.

Cranial Rhythm Impulse Technique, CSF Directing, Respiratory Rocker Technique (RTRT), Temporal Reciprocating Technique, Ventricular Compression Technique, Sphenobasilar Symphysis Technique, and Cranial Vault Balancing Technique will each be presented.

The Nelson De Camp Material (Part 1)

All instructors in these sections have received special training from Dr. De Camp in the utilization and teaching of his research material.

DR. NELSON De CAMP'S ORTHOPEDIC and NEUROLOGICAL TESTING of the SACROILIAC JOINT

1 ½ hours

Saturday, 1pm – 2:30pm

Michael Cindrich, DC, DICS

Steve Apicerno, DC, AP

Dan Tuttle, DC, CP

Christopher Pepitone, DC, CP

This class will present Nelson De Camp, DC, FICS, DACAN's peer reviewed procedures for orthopedic and neurologic testing of the sacroiliac joint. This work integrates Dr. De Camp's scientific SOT® methods examination procedures with mainstream chiropractic analysis and adjusting.

The Nelson De Camp Material (Part 2)

DR. NELSON De CAMP'S CRANIAL RANGES of MOTION

3 hours

Saturday, 3pm – 6:30pm

Dan Tuttle, DC, CP

Michael Cindrich, DC, DICS

Steve Apicerno, DC, AP

Christopher Pepitone, DC, CP

This class presents Nelson De Camp's pioneering study of cranial ranges of motion. This is a hands-on class that teaches a procedure that can be both diagnostic as well as corrective. The format of the class allows the attendee to feel for themselves the power and effectiveness of gently working with the cranium.

TRACK TWO: Thursday

SECOND TRACK – CHIROPRACTIC MANIPULATIVE REFLEX TECHNIQUE (CMRT)

All classes in this section teach Major DeJarnette's Chiropractic Manipulative Reflex Technique (CMRT). The analysis is organized along seven occipital fiber areas, each incorporating neurological reflex circuits linking them directly to a specific vertebral level and corresponding organ system. The system is designed to find and alleviate spinal interference as well as conservatively and effectively find and abnormal visceral physiology.

Second Track

3 hours

Thursday, 8am – 11:30am

Participants following this track will join the participants in the first track for Dr. Pick's two presentations.

Occipital Fiber Analysis

1 ½ hours

Thursday, 1pm – 2:30pm

Ned Heese, DC, FICS

This class focuses on the theory and clinical use of occipital fibers, the primary analytical indicator system used in CMRT to both locate and begin treatment of the afflicted organ system and the corresponding spinal vertebral level. Dr. Heese was Major De Jarnette's personal chiropractic physician for many years and is truly an expert at this technique.

CMRT Fiber #6 – Liver Syndrome

1 ½ hours

Thursday, 3pm – 4:30pm

Noel Taylor, DC, AP

This class presents the liver / thoracic eight complex; its analysis, treatment and clinical considerations.

CMRT Fiber #6 – Colon Syndrome

1 ½ hours

Thursday, 5pm – 6:30pm

Noel Taylor, DC AP

This class presents the colon / lumbar four complex; its analysis, treatment, and clinical considerations.

TRACK TWO: Friday

CMRT Fiber #2 – Lung Syndrome

1 ½ hours

Friday, 8am – 9:30am

Kim Shara, DC, DICS

This class presents the lung / thoracic three complex; its analysis, treatment, and clinical considerations.

CMRT Fiber #2 Kidney Syndrome

1 ½ hours

Friday, 10am – 11:30am

Kim Shara, DC, DICS

This class presents the kidney / thoracic eleven and twelve complex; its analysis, treatment, and clinical considerations.

SOFT TISSUE ORTHOPEDICS – STO

4 ½ hours

Friday, 1pm – 6:30pm

Catherine Quill, DC, AP

Andrew Bourne, DC, AP

These sessions present some of the work of M. L. Rees, DC, a pioneer, researcher, and master practitioner of SOT® methods. This work is presented as a complete and powerful healing system in and of itself. It is congruent and compatible with the main body of SOT® methods protocols, or with any full spine chiropractic adjusting system.

TRACK TWO - Saturday

CMRT Fiber #1 – Coronary Syndrome

1 ½ hours

Saturday, 8am – 9:30am

Dan Madock, DC, DICS

This class presents the coronary / thoracic one complex; its analysis, treatment, and clinical considerations.

CMRT Fiber #1 – Myocardial Syndrome

1 ½ hours

Saturday, 10am – 11:30am

Dan Madock, DC, DICS

This class presents the myocardial / thoracic two complex; its analysis, treatment, and clinical considerations.

CMRT Fiber #5 – Splenic Syndrome

1 ½ hours

Saturday, 1pm – 2:30pm

Jennifer Den Bleyker, DC, AP

This class presents the spleen / thoracic seven complex; its analysis, treatment and clinical considerations.

CMRT Fiber #5 – Glandular Syndrome

1 ½ hours

Saturday, 3pm – 4:30pm

Jennifer Den Bleyker, DC, AP

This class presents the glandular / lumbar three complex; its analysis, treatment, and clinical considerations.

Clearing Stealth Pathogens with CMRT and Nutrition

1 ½ hours

Saturday, 5pm – 6:30pm

Suzanne Seekins, DC, DICS

Dr. Seekins presents her latest research into advanced levels of CMRT.

TRACK THREE - Thursday

THIRD TRACK – RESEARCH AND DOCTOR SHARING

These classes incorporate the use of SOT® methods related clinical chiropractic research to be able to use the latest findings and techniques to find and treat nerve interference in the spine, pelvis or any place in the

living human body. These classes draw upon hard science and are designed to be of practical use to practitioners working to alleviate suffering and promote health.

SCOLIOSIS – AN SOT® methods PERSPECTIVE

1 ½ hours

Thursday, 8am – 9:30am

John Farmer, DC, FICS

Doctor Farmer will present his original research and development of methods of treating patients with scoliosis using SOT® Methods. These methods include orthopedic blocking as well as other adjusting techniques. This work is sure to enhance any chiropractor's effectiveness in dealing with people with this syndrome.

BALANCING HIDDEN SUBLUXATION PATTERNS in the PELVIS

Plus: PAIN CONTROL

1 ½ hours

Thursday, 10am – 11:30am

John Farmer, DC, FICS

Doctor Farmer will present his original research regarding pelvic subluxations, system re-vitalization, and pain control. These SOT® Methods based techniques are highly effective and sure to enhance any chiropractic practice.

UPPER EXTREMITY ADJUSTING

LOWER EXTREMITY ADJUSTING

4 ½ hours

Thursday 1pm – 6:30pm

Christopher Ourganian, DC, AP

Doctor Ourganian will present analysis and adjustment protocols for upper and lower extremities, and how extremity work feeds back into the central nervous system function at a spinal level and aids in clearing categories. Dr. Ourganian draws upon his extensive experience in the field of sports injuries in formulating this class.

TRACK THREE - Friday

CHIROPRACTIC PEDIATRICS

8 hours

Friday, 8am – 6:30pm

Steven Williams, DC, FICS

Doctor Steve Williams is an SOT® Methods chiropractor, and internationally renowned lecturer, and author on the subject of Chiropractic Pediatrics. He will present his popular and informative course all on Friday. These classes can help the chiropractic physician open whole new areas in their clinical practice, vastly expanding the types of patients that they can help.

TRACK THREE - Saturday

MUSCULOSKELETAL INTEGRATION THEORY

THE SACROILIAC WEIGHT- BEARING COMPLEX

3 hours Saturday, 8am – 11:30am

Rick Serola, DC

Doctor Serola is the developer of the Serola trochanteric sacroiliac support belt. He is also a chiropractic researcher with a pronounced focus on the sacroiliac joint as well as its synergistic relationships with the joints, ligaments and muscle throughout the human body. He will present a detailed tour of the structure and movement of the entire weight-bearing complex, in both ideal and response situations.

Serola is a world-renowned authority on the subjects presented.

THE PSOAS MUSCLE – NEW AND CLASSIC CLINICAL CONSIDERATIONS

1 ½ hours

Saturday, 1pm – 2:30PM

Clorinda Katz, DC, CC

In this class Dr. Katz will review the anatomy and clinical importance of the psoas muscle complex. She will present the fundamentals of analysis and treatment as well as some of her original clinical research. This class will include an extensive hands-on experience.

CMRT LINE THREE FIBERS

1 ½ hours

Saturday, 3pm – 4:30pm

Ned Heese, DC, FICS

In this class Dr. Heese will present an in-depth look at Dr. De Jarnette's much misunderstood Line 3 Occipital Fiber CMRT research. The class will include analysis, significance, and treatment. It will include hands-on experience.

MAXIMIZING the SOT® METHODS VISIT USING BEARDALL HAND MODES

1 ½ hours

Saturday, 5pm – 6:30pm

Beth Forgosh, DC, CC

Doctor Forgosh plans to share with the class some her SOT® method work that she has found useful in streamlining her patient visits utilizing some clinical "hand modes" that were developed by Dr. Alan Beardall. There will be a hands-on component to this class.

TRACK FOUR - Thursday

FOURTH TRACK – CHIROPRACTIC CRANIOPATHY

These classes explore the nuts and bolts of Chiropractic Craniopathy as originally put forth by the founder, M. B. De Jarnette, and as developed and presented by SORSI, his research and teaching organization. Several advanced cranial techniques will be presented and expounded upon, with the opportunity for the participant to get some essential hands-on experience under the guidance of some of the world's finest craniopaths.

SUTURAL TECHNIQUE

Part One

1 ½ hours

Thursday, 8am – 9:30am

Joe Unger, DC, FICS

Session 1 – Anatomy, physiology and neurology of the human cranial system and its role in cerebral spinal fluid production and flow. Demonstration of full sutural process.

SUTURAL TECHNIQUE

Part Two

1 ½ hours

Thursday, 10am – 11:30am

Joe Unger, DC, FICS

Session 2 – Overview of the cranial sutural protocols including indications, contraindications, evaluation, treatment steps and patient management. Description of the seven steps.

SUTURAL TECHNIQUE

Part Three

1 ½ hours

Thursday, 1pm – 2:30pm

Joe Unger, DC, FICS

Dan Madock, DC, DICS

Kim Shara, DC, DICS

Michael Cindrich, DC, DICS

Session 3 – Steps one and two, including TMJ and Maxilla Techniques, applications, and hands-on practical training.

SUTURAL TECHNIQUE

Part Four

1 ½ hours

Thursday, 3pm – 4:30pm

Drs. Unger, Madock, Shara, and Cindrich

Session 4 – Steps three and four, including the Temporal Technique and the Sphenoid Adjustment, applications, and hands-on practical training.

SUTURAL TECHNIQUE

Part Five

1 ½ hours

Thursday, 5pm – 6:30pm

Drs. Unger, Madock, Shara, and Cindrich

Session 5 – Steps five , six , and seven, including Fronto-Parietal Technique, ‘V’ Technique, Occipital Technique, and Ending Procedure, applications, hands-on training. Recap, questions and answers.

TRACK FOUR - Friday

CRANIAL COLLOQUIUM

3 hours

Friday, 8am – 11:30am

Bradley Kuntz, DC, CC

Frontal Fruit Jar

Category II Cranial Sphenomax Adjustment

Category III Cranial Adjustments

Sub Occipital Dural Adjustment

Vagal Nerve Adjustment

Cerebellum Pain Control

Four Hand Cranial Adjustments

This class will feature some advances in the cranial field as researched by Drs. Skipstead, Buddingh, and others, as well as by Dr. Kuntz. These techniques can be a vital resource in any caraniopathic practice.

CATEGORY I INTRAORAL CRANIAL ADJUSTING

4 ½ hours

Friday, 1pm – 6:30pm

Marc Pick, DC, FICS, DACNB

This is core curriculum of SOT® method Chiropractic Craniopathy as taught by a master practitioner. These classes include cranial form and function, analysis, and treatment protocols for both the doctor and the assistant, providing both with ample hands-on experience.

This series of classes includes:

Flexion and Extension Occipital Subluxations

1 ½ hours

Internal and External Temporal Subluxations

1 ½ hours

Internal and External Frontal Subluxations

1 ½ hours

TRACK FOUR - Saturday

CRANIAL AREA SPREADS and VISUAL PROCESS ANALYSIS

4 ½ hours

Saturday, 8am – 2:30pm

Suzanne Seekins, DC, DICS

Christopher Ourganian, DC, AP

These classes will present powerful techniques based on some of Dr. De Jarnette's work and further developed by Drs. Unger, Seekins, and Ourganian. The protocols are elegant in their simplicity and quite dramatic in their therapeutic results. The class will include extensive hands-on experience.

SOT® Method Nursing and Tongue Tie

3 hours

Saturday, 3pm – 6:30 pm

Josephine Sexton, DC, CC

This presentation explores the importance of good tongue function in neurological and cranial development, how to tell the difference between dysfunctional tongue and a tethered tongue. It also provides information on grading tongue dysfunction (especially important in communicating with other health professionals), and how various chiropractic approaches are used to resolve tongue dysfunction and resultant issues.

All instructors are board certified to teach their respective courses.

SORSI has a very deep bench, so that in the event of an unforeseen circumstance, in which any one particular instructor is suddenly unable to attend or teach their assigned curriculum class, there are

usually several equally qualified doctors ready and able to step in and ably present the same or equivalent material in a more than satisfactory manner.

Respectfully submitted:

Michael J. Cindrich, DC, DICS
SORSI Vice President for Education

June 2019
